EDUCATION COMMISSIONERS TO KEEP THEIR DEPARTMENT CLEAN

Will Show No Mercy to Certain Classes of Offenders — Inspector Files Report on Vocational Schools

In making public its reasons for demanding the resignation of Principal John A. Medeiros, of the Haou school, at Hana, Maui, the commission of public instruction yesterday emphatically announced its position on matters of this kind. It declared that teachers or other members of the department of public instruction whose conduct is shown to be such as that of Medeiros is alleged to have been, need anticipate no leniency at the commission's hand, and that, when discovered, they will not only be driven from the department, but the exact reasons for so doing will be formally given out, so that there will be no misunderstanding among parents or patrons of the public schools.

In the present instance, the principal discharged is held up as an object lesson and warning to others, and it was announced that those personally interested might inspect the evidence in the case upon personal application to the Superintendent.

The board, in straightening out the affairs of the Haou school, made a change that probably will meet with the approval of County Supervisor R. A. Drummond, who violently opposed the appointment of Miss Jennie Plant, of the Haou school, as principal at Hana to succeed Medeiros. Miss Plant is ordered back to her former position at Hana, while William Hala, who has been teaching at the Kaele school, is made principal at Haou, with Mrs. John A. Medeiros as his assistant. Hala and Mrs. Medeiros are brother and sister.

School Commissioner Rice returned to Kaula this morning, but the remaining members of the board continued their session today, devoting the morning to an inspection of the girls' industrial school building under construction at Moulili.

A feature of yesterday's meeting was the report on vocational schools, read by Inspector T. H. Gibson. The report is given below in full:

"In order to better meet the educational needs of the great mass of the children in this territory, it was planned to supplement the present educational system by establishing industrial and agricultural schools during this present biennial period. In furtherance of this plan the school law relating to compulsory attendance was amended by the last legislature. As amended the law reads:

"The attendance of all children from six to seventeen years of age is obligatory and it shall be incumbent upon all parents, guardians and others having the responsibility and care of children of such ages, to send them to some school; provided that when a child has reached the age of twelve years and has not completed the fourth grade of the primary school, he shall be eligible for instruction only in an industrial school or vocational school, provided there is such a school within four miles of his home or suitable transportation to such a school has been provided." Types Preceded.

"Two types of such schools have been proposed—one an industrial school where boys will be taught, in addition to simple class-room work, gardening, dairying, poultry raising, blacksmithing, carpentry, etc., and girls will learn housekeeping, cooking, sewing, mending, dressmaking, laundrying, etc., in large centers of population; the other an agricultural school established in proximity to and by the co-operation of well developed agricultural interests.

"An arrangement was made with the Kahuku Plantation company to furnish the necessary land and buildings for the establishment of such a school to be called an Agricultural High School, so as to be entitled to the federal aid provided for such schools in the Page Bill. This was to be a boarding school with accommodation for fifty boys.

Experiment Disappoints.
"It was found after an experience of four months in enrolling boys who wished to avail themselves of the advantages afforded by this school, that the number of boys who were anxious to attend such a school were very much smaller than had been anticipated and only about fifty boys were enrolled, composed of the following nationalities:

Whites	5
Hawaiians	17
Port-Hawaiians	8
Portuguese	7
Chinese	3
Japanese	6

Total 52

"For various reasons no special efforts were made to interest Oriental boys in this school.

"There were several reasons for the lack of enthusiasm on the part of the parents and the boys. It became apparent that there was considerable opposition to the school. It was reported that this was to be a sort of a reform school. Some of the parents professed to think it was a plan to make laborers of their sons for the benefit of the plantations, etc.

"The plantation people were, rather loath to incur the necessary expense for the establishment of the school unless it was reasonably sure that the minimum number of boys (fifty) could be maintained and this did not seem to be the case, judging from the small number enrolled. It was also considered unwise to make the experiment unless success was assured, so it was decided to postpone the establishment of such agricultural high school.

Create a Demand.
"In order to create a demand for such a school, it has been suggested that pupils over twelve years of age be allowed to work part of the day

and attend school part of the day, where satisfactory arrangements can be made with the neighboring interests, where such labor is required.

"This plan will require no extra teachers and no extra expense. It is expected that this method will bring the school closer to the people and will secure more regular attendance, while the parents with large families and small means will be greatly benefited and the children will get the benefit of regular training in habits of industry and of being, at least in part, self-supporting.

"The matter of establishing a general industrial school in Honolulu was taken up by a committee of teachers. This committee found an unanimous opinion in favor of starting such a school and to support that opinion over \$1300 was subscribed. An option was secured on the Aliolani College buildings and grounds, which premises are quite suitable for such a school as regards buildings, area of grounds, situation, etc. The rent for these premises was to be \$125 a month, or \$1250 for the remaining ten months of the biennial period.

"At the time when this industrial school was being so enthusiastically planned, for that in May and June last it was believed that the teachers necessary could be placed on the regular payroll and that the funds subscribed would furnish the outfit and may rent for buildings and grounds, but when the schools opened in September it was found that the number of teachers necessary for the ordinary school room work would reach the limit allowed by law, so that the establishment of such school would have to be postponed until sufficient funds were available—that is, it will be necessary to ask the legislature to make a special appropriation for these schools.

Begin With Girls.

"If teachers were available a beginning could be made for girls when the Girls' Industrial School is moved to its new quarters. The present buildings could be used for a vocational school for girls, or the old Chinese Hospital, now occupied by part of the Kalahele school, would serve the purpose and the grounds and buildings of the Girls' Industrial School be added to the Kalahele school.

"For a general industrial school the needs and work were outlined about as follows:

"Equipment—A tract of land in the vicinity of Honolulu—10 to 25 acres—suitable for cultivation of foreign plants, vegetables, fruit, etc.

"Buildings for school room, dining room, for sewing room.

"Shops for blacksmith, carpenter, work etc.

"Buildings for laundry, dairy, chickens, etc.

"These buildings may be of very simple construction, most of them of the pavilion type.

"In this school the class room work might occupy the forenoon—that is from 9 to 12, with classes alternating.

"The hours from 1 to 4 can be devoted to work, and part of the morning when class room work is finished.

"If any live stock be included in the equipment of the school, provision would have to be made for work in the mornings and evenings. It would probably be necessary to have some of the teachers and pupils reside on the premises.

Division of Labor.

"The boys will work in the garden, shops, dairy, chicken yard, etc. The girls will do cooking, sewing, mending, etc. They might also learn something of gardening, dairying, the care of chickens, etc.

"The teaching force to consist of a principal or general manager and practical teachers for gardening, blacksmithing, carpentry, dressmaking, cooking, laundrying, etc.

"It should be the aim to make the school as nearly self-supporting as possible. The work of all kinds done in this school should be practical and should produce sufficient revenue to pay the boys and girls a regular wage."

PINEAPPLE DECLINED; SUGARS STILL FALLING

No sugar stock was sold on the board today, the only deals being in bonds and pineapple, the latter declining a half point to 46 for 50 and 25 shares. Bond sales were \$1000. Hawaiian sugar at 102, a decline of one-half, and \$1000 Hilo 1901 sales unchanged at 100.35. In sales reported were \$7000 Hawaiian Irrigation sales at 101 and \$7000 Hamakua Ditch sales at 103.

As published yesterday afternoon, Pioneer sold down four points to 25, which proves to have been for a block of 65 shares, and Ewa down a quarter point to 25.50, the sales being of 50, 35 and 15 shares. After session yesterday, Oahu sold 24 for 40 1/2 shares, 100 shares in five unequal lots going at 23.75.

A dividend of \$1.50 a share on Hawaiian Agricultural is announced today, the amount being \$39,000.

MAUI STORE WILL HAVE NEW BUILDING

WAILUKU, Nov. 19.—The bid for the erection of the new building for the Maui Dry Goods and Grocery company has been let to H. K. Yamashita of Wailuku for the sum of \$11,250. The new fixtures will cost about two thousand more, so the total will make a neat sum to be expended by the company for their new store. There is no small store on Maui that has made such rapid strides as the Maui Dry Goods during the last four or five years.

Settlement of the land question between the city of Hilo and the Wailuku Mill Company is promised at an early date. The land board, the Governor and Land Commissioner are to give a conference on the matter shortly, and F. M. Swanson, of Theo. H. Davies & Co., agents for the mill, has stated that the 216 acres which Hilo desires to add to its building territory probably will be turned over to the municipality, the company, in return receiving the privilege of buying a number of camp sites on the government land it now has under lease.

YOUNG MEN OF FASHION

YOUNG MEN of fastidious taste are the most critical in their choice of clothes. They prefer "ALFRED BENJAMIN" CLOTHES to clothes made to measure. Many of the best dressed men in town are wearing "BENJAMIN" CLOTHES. There are many reasons why they are wearing them. Come in and let us tell you of the reasons.

THE CLARION

RE-DRAFTING CITY'S PLUMBING ORDINANCE

Deputy City and County Attorney Mirman is hoping that by the time the Board of Supervisors meets for its next session he will have completed work upon the re-draft of the proposed plumbing ordinance. He said this morning that the new ordinance when finished and passed, by the board, will provide for the creation of a board which will conduct examinations for journeymen and master plumbers, and will also contain several alterations and improvements on the old measure, all of which have been suggested by experience.

Local commissioner Blanchard sustained a painful injury yesterday afternoon when he upset a vat of sulphuric acid on his right hand, severely burning three fingers on that member.

HAVE YOU A CHILD?

It was shown in a recent issue of the Star-Bulletin that by the time the Board of Supervisors meets for its next session he will have completed work upon the re-draft of the proposed plumbing ordinance. He said this morning that the new ordinance when finished and passed, by the board, will provide for the creation of a board which will conduct examinations for journeymen and master plumbers, and will also contain several alterations and improvements on the old measure, all of which have been suggested by experience.

Plumbers interested in the new ordinance are asked to attend the Public Hall, where a copy of the ordinance is on file, for a description.
